

The 5GV is a cutting-edge vibration and tilt monitor that boasts exceptional precision and an integrated 3G/4G/ LTE gateway making it the ideal solution for a wide range of industries. Slim custom case fits into tight spaces and able to handle hazardous environments. Designed to be user-friendly and easy to configure, install, and manage remotely.

Thanks to its low-power design and external power options, the 5GV minimizes maintenance activities, allowing you to focus on what really matters. 5GV stands for 5th generation vibration and is developed by Global Sensing Solutions Limited.

**Triaxial vibration monitoring**

**OTA firmware updates**

**Full waveforms**

**Sound monitoring with microphone**

**Biaxial tilt**

**Low power usage**

## BENEFITS WITH THE 5GV

- All-in-one, no cables needed for vibration or tilt monitoring
- Real-time alert and data via SMS or MQTT
- Easy integration into any system
- Low power usage with the possibility of external power
- Choose between replaceable lithium batteries or rechargeable lithium batteries
- Multiple communication module options – 3G/4G/LTE, Wi-Fi
- Antenna extension cables available for a stronger signal
- Just one bolt to mount on surfaces (M8)
- Auto-orientation, mount in any orientation
- IP67-classed
